

# TEKA desinfecto® Spray PRO / ECO / BASKET

...give your customers  
a secure feeling.

Hygienic. Simple. Safe.

 **TEKAWE**  
lubrication - dosing - controlling

## Disinfection spraying system For a safe feeling of your customers.

Hygienic handling when shopping. Nobody wants to carry the spray bottle with disinfectant and wipes in their hand anymore.

Give your customers a feeling of security. They will thank you for it.

With our further development of the proven spraying system TEKA exacto Spray, this is exactly where we come in: simple and convenient disinfection of shopping carts, baskets and luggage trolleys.

Space-saving. Comfortable. Hygienic.

The precisely aligned spray valves automatically wet the handle surface with disinfectant. The customer no longer needs to touch a switch to activate them. The fine spray mist is triggered contact-free by a sensor. The disinfectant is supplied directly via a hose from the original container.

In addition to the disinfection of the car handles, every customer can disinfect his hands just as conveniently.

Due to the high degree of automation and the contactless operation we achieve a practical and fast handling on site ... without high personnel expenditure.

### Compact and mobil

Our systems impresses with their compact and space saving design made of high-quality materials.

At the same time, the shopping cart version is equipped with four fixable rollers for easy transport as well as a stop for exact positioning. For the outdoor area with a wind-protecting enclosure, for the indoor area the enclosure was omitted.

Desinfecto ... everything hygienically clean!

## TEKA desinfecto® Spray - against viruses and germs

- We would be pleased to submit you an offer for your individual application or carry out spray trials and test demonstrations - also for surface disinfection.
- You are welcome to contact us.
